SÁNDOR DARÓCZI

ABOUT ME

I am a passionate MSc Mathematics student with strong Python skills and a comprehensive knowledge of Data Science, Machine Learning, and Mathematical Optimization. Always prepared for new challenges and keen on learning new skills. Right now, my main focus is to learn more about state-of-the-art ML Methods, including Graph Neural Networks, Generative Models, Deep Learning Models, and their applications in science / industry.

EDUCATION

Technical University of Munich — 2021 - Ongoing
MSc Mathematics in Operations Research

- Areas of focus: Machine and Deep Learning, Statistics, Mathematical Optimization
- Weighted average grade: 1,2 (GPA: 3,8)
- DAAD Master's scholarship recipient for the academic year 2022/23
- Exchange semester at the National Taiwan University in Taipei, Taiwan

Eötvös Loránd University — 2018 - 2021
BSc Mathematics

- Areas of focus: Graph Theory, Probability Theory, Theoretical Mathematics
- Weighted average grade: 4.96/5.00 (GPA: 3,9)
- Received a research scholarship for conducting research in Graph Theory

WORK EXPERIENCE

Working Student - AI — Feb 2024 - Present
Rohde & Schwarz GmbH & Co. KG.

- Developing cutting-edge AI technologies in Python for applications in Air Traffic Control

Working Student - Data Science — Oct 2022 - Mar 2023
Lidl Stiftung & Co. KG

- Worked as part of the Lidl Analytics team developing novel machine learning solutions for challenging uncertainty estimation problems in demand forecasting and price estimation
- Implemented and evaluated 8 state-of-the-art ML and DL models using Python (Pytorch)
- Integrated the code into the existing code infrastructure in Databricks, scaling for over 11,900 Lidl stores across 30+ countries

Intern - Data Science — Apr 2022 - Sep 2022
Spryfox GmbH

- Developed Python code for a ML model architecture for long-term health risk prediction
- Trained, tuned, and evaluated a list of state-of-the-art classification models using scikit-learn and pandas, resulting in a 5% overall increase in model accuracy
- Developed and debugged code for a web crawler application using AWS and Terraform

PERSONAL DEVELOPMENT

Private Math Tutor
- Tutoring university and high school students in Mathematics (2-3h/week)

Event Organizer
- Organizing weekly events and trips for incoming Erasmus students (2h/week)

Former Exchange Student
- Studied Computer Science at the best university in Taiwan for a semester
- Completed an HSK 2-level Chinese intensive language class with the highest grade (6+4h/week)

Self-Taught Developer
- Learned about machine learning, deep learning, Java programming, and backend development out of personal interest

Munich, Germany, 28.02.2024

TECHNICAL SKILLS

Programming
- Python
- R
- Java
- C++

Data Analytics & ML
- Pandas
- scikit-learn
- PyTorch
- Tableau

Cloud Services
- AWS
- Terraform
- Databricks

Other Tools
- Git
- GitLab CI / CD
- SQL
- Docker
- HTML

LANGUAGES

- Hungarian - native
- English - fluent
- German - fluent
- Mandarin - beginner
- Russian - beginner

HOBBIES

- **Running:** Training three times a week for my first marathon this Autumn.
- **Learning languages:** Achieved conversational level Russian, learning Mandarin Chinese.
- **Classical music:** Playing the violin for 12 years and learning the piano for 5 years.
- **Reading classical literature**: My (current) favorite book is Fyodor Dostoevsky's 'The Brothers Karamazov.'
